

BS009 5 Tiers Installation Instruction

								
Eccentric screw	Eccentric Bolt	metal pin	handle	handle screw	hook up	supporting item	Short self-tapping screw	long self-tapping screw
A*52	B*52	C*10	D*5	E*5	F*10	G*10	H*20	I*30

Kind tips: When installing, tighten the screws seven times,

Eccentric installation principle : Wait until everything is done before tightening!

	
air hole	J*5
	K*4

1. Screw the eccentric screw onto the board

2. Find the corresponding board to insert

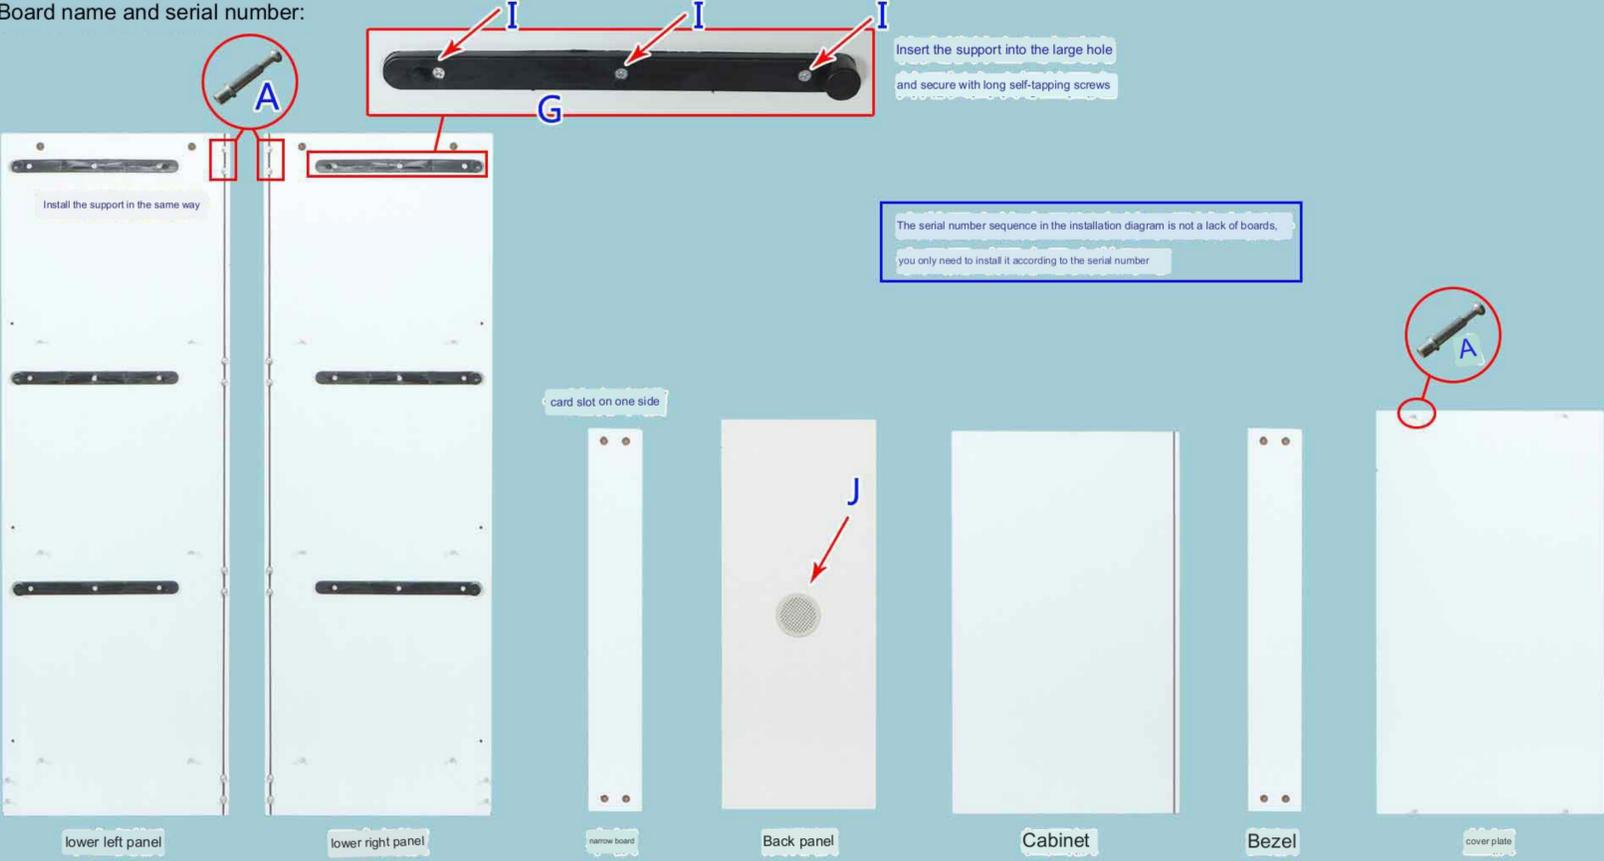

3. Insert the eccentric bolt into the round hole

4. Rotate 180° clockwise to lock the board

5. (Image showing the board being rotated)

6. (Image showing the handle screw being inserted)

Board name and serial number:

Insert the support into the large hole and secure with long self-tapping screws

The serial number sequence in the installation diagram is not a lack of boards, you only need to install it according to the serial number

card slot on one side

lower left panel (1)

lower right panel (2)

narrow board (4) 0x5

Back panel (5) x5

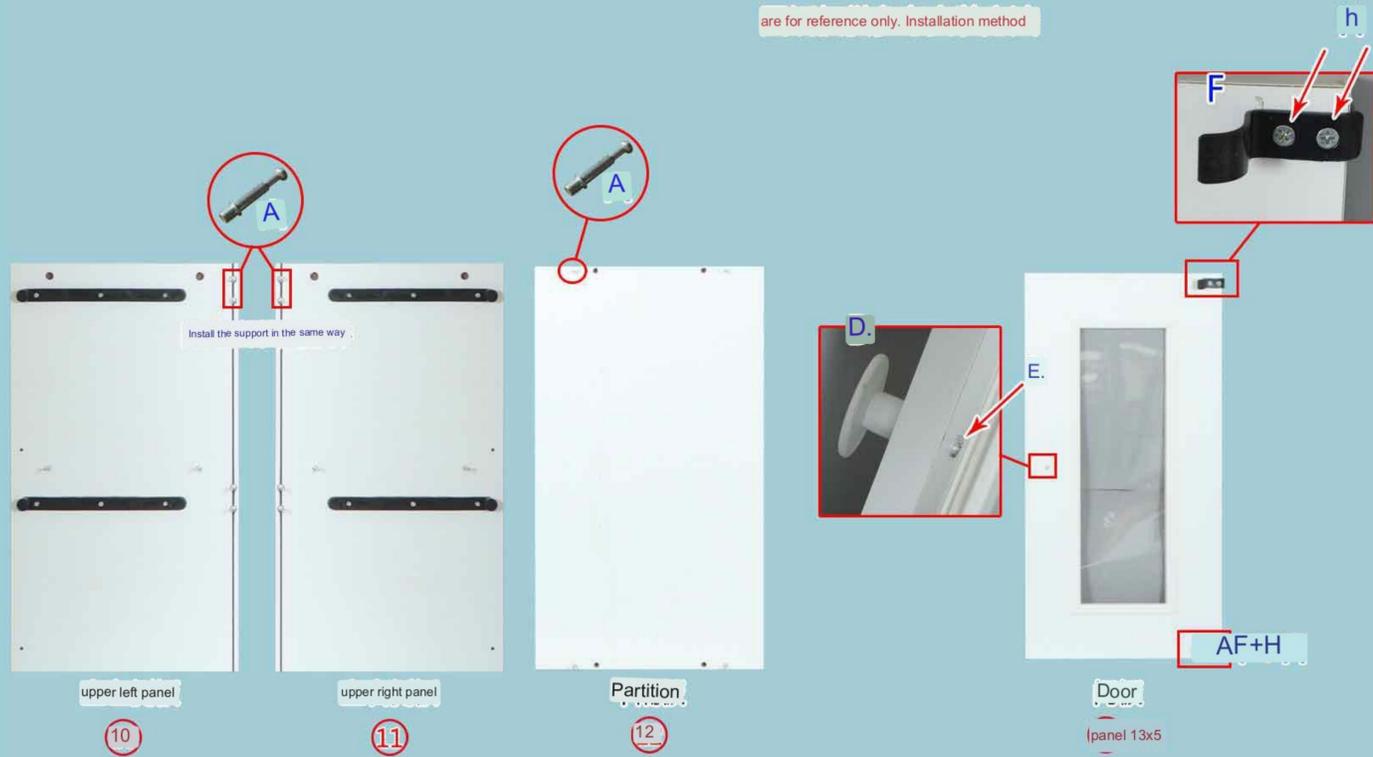

Cabinet Shelves (6)x4

Bezel (7)x2

cover plate (9)

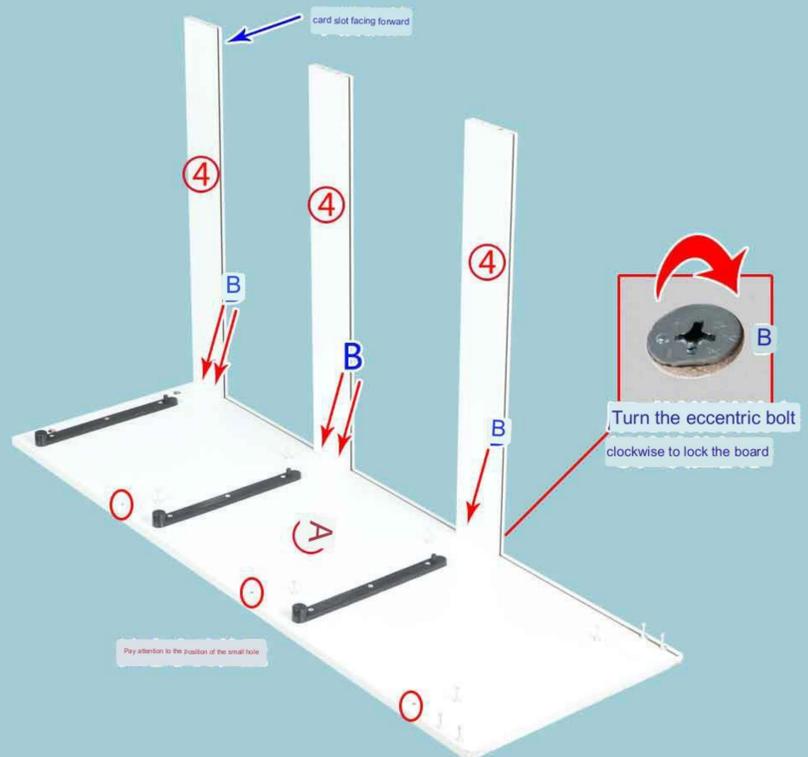

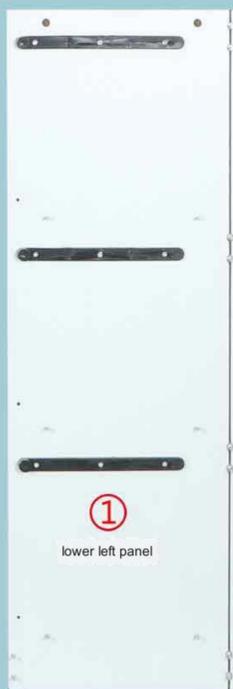

Handles and handle screws are subject to what you actually received. Drawings

are for reference only. Installation method

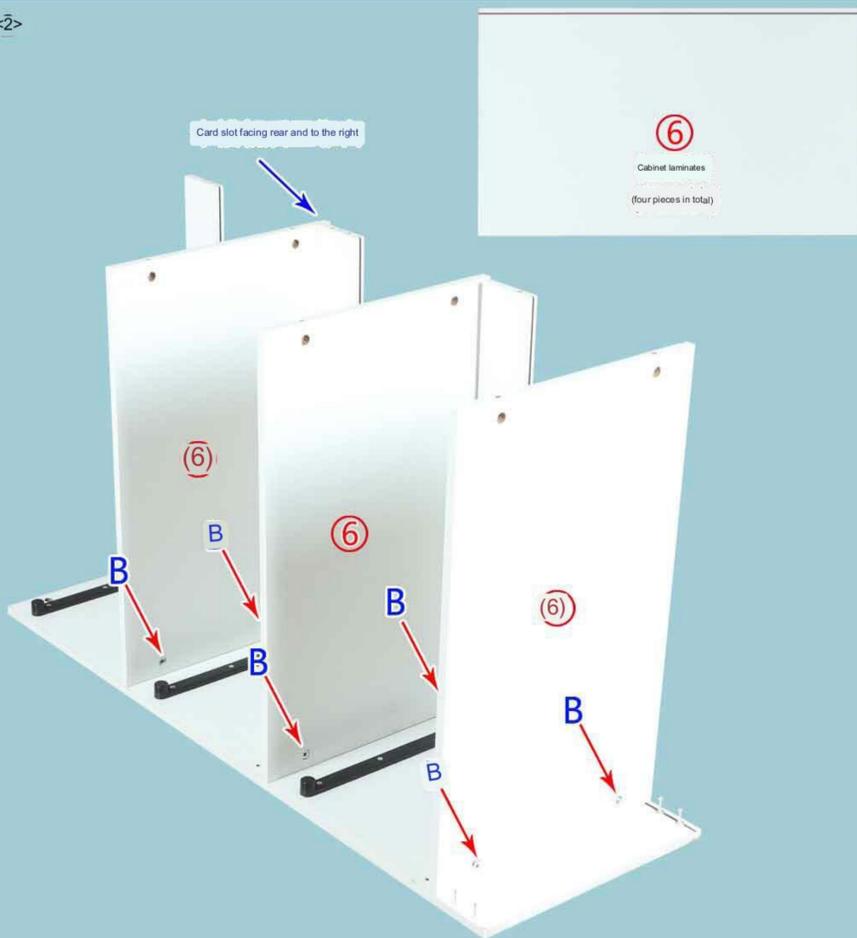

step 1: The second half of the installation

<1>

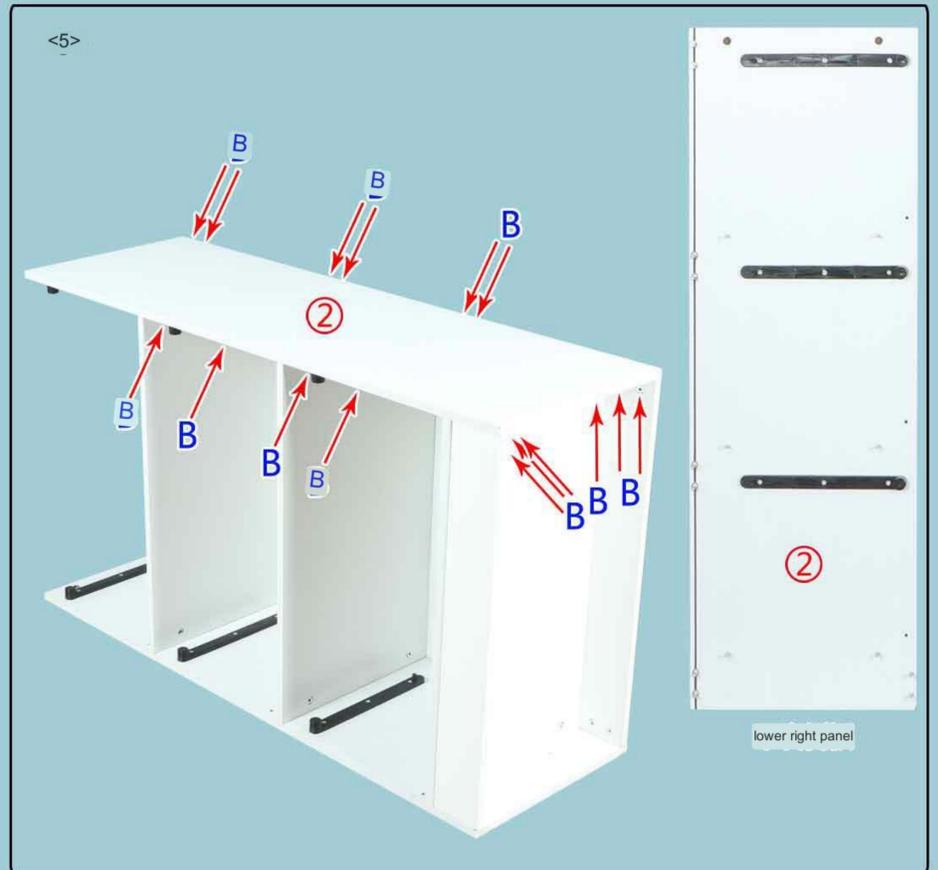

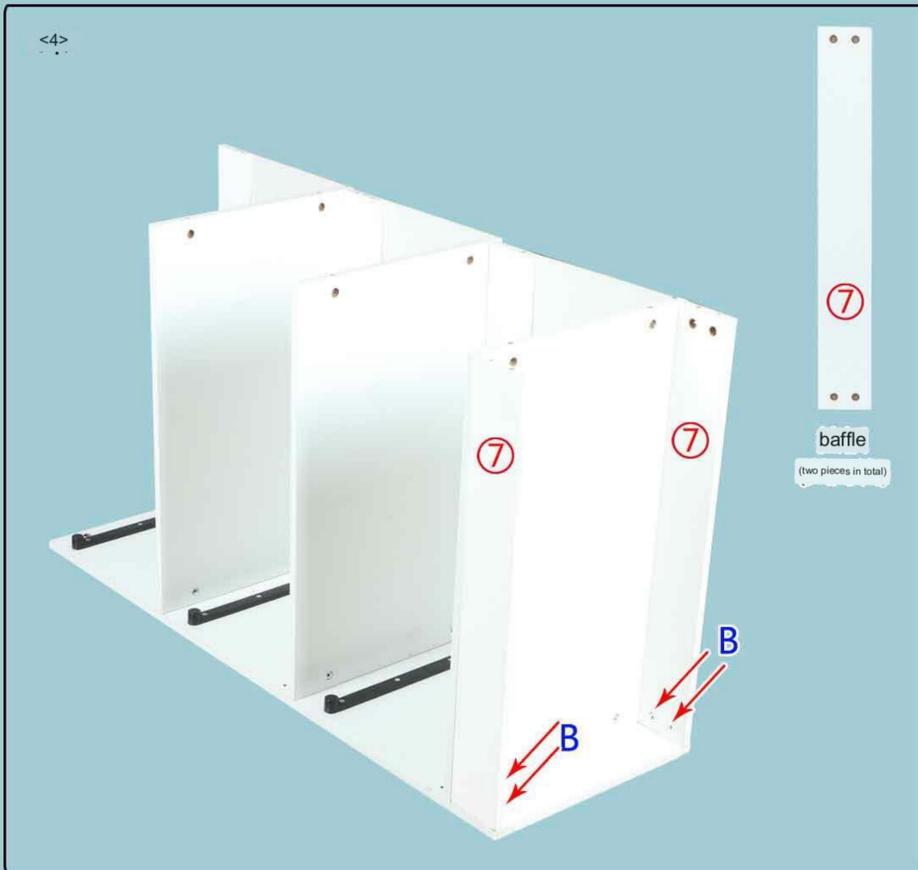

<2>

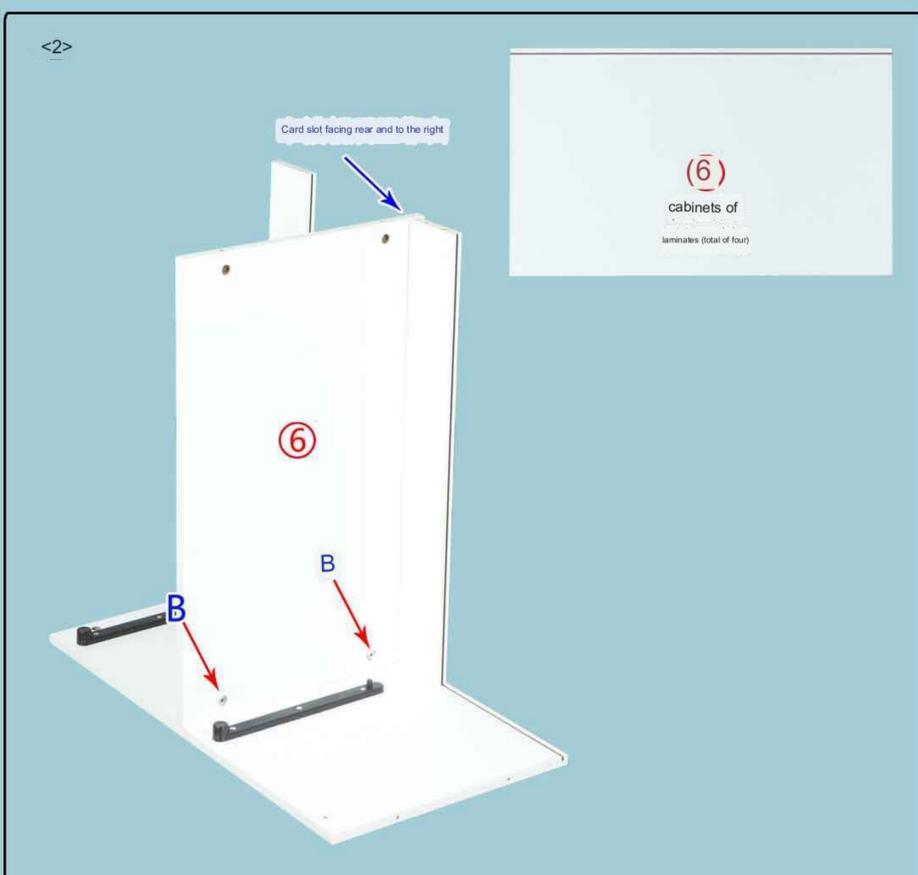

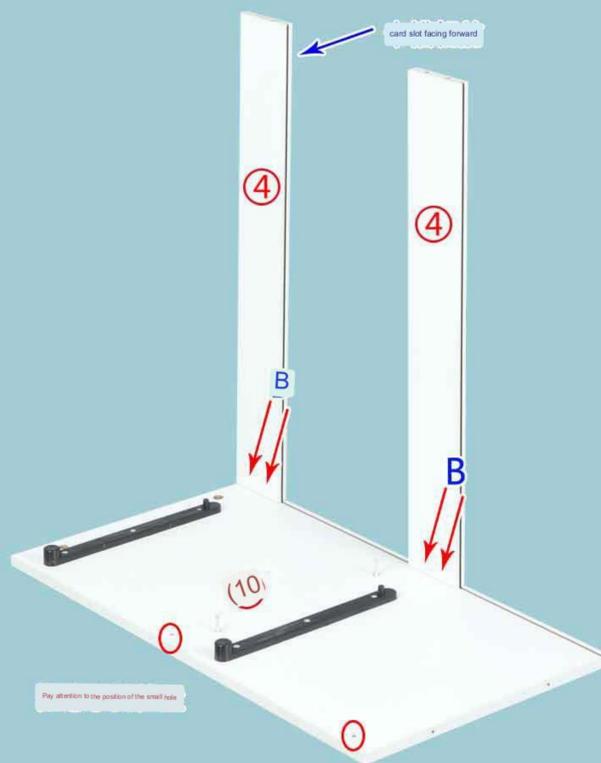

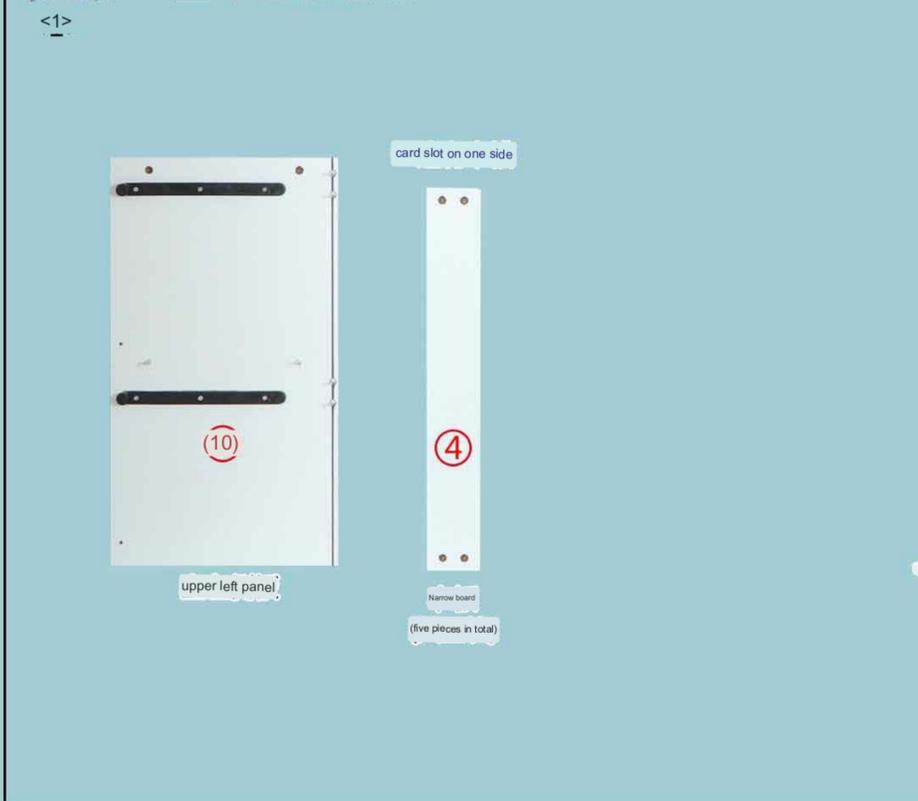

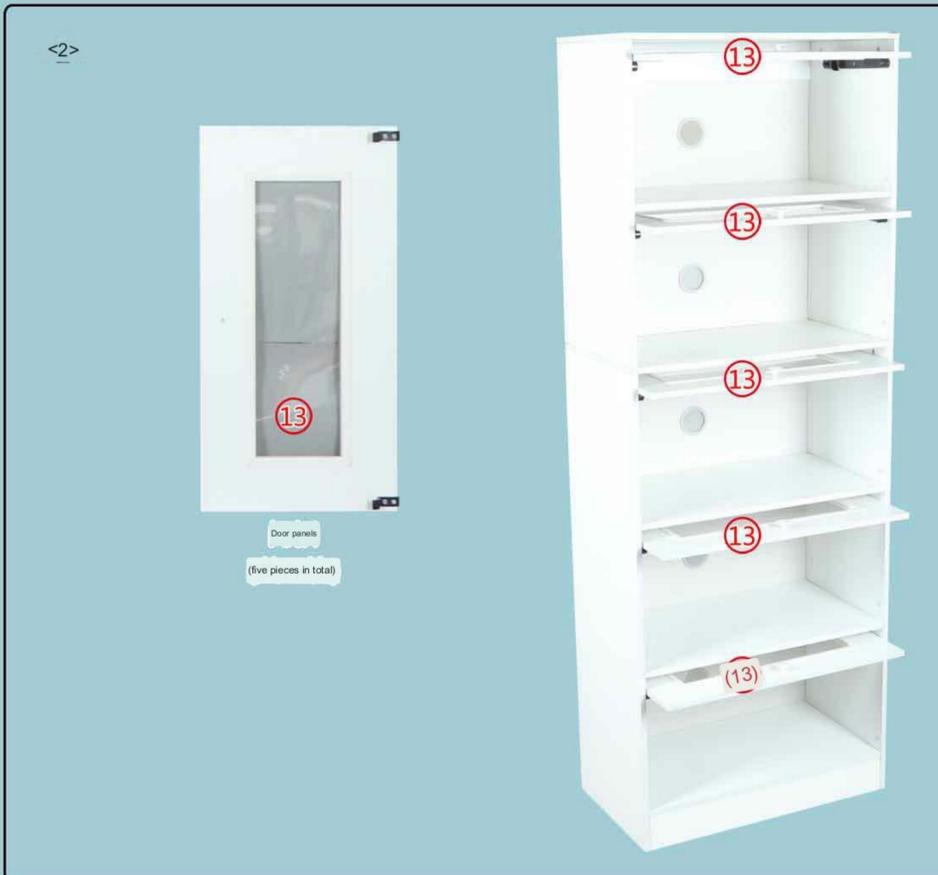

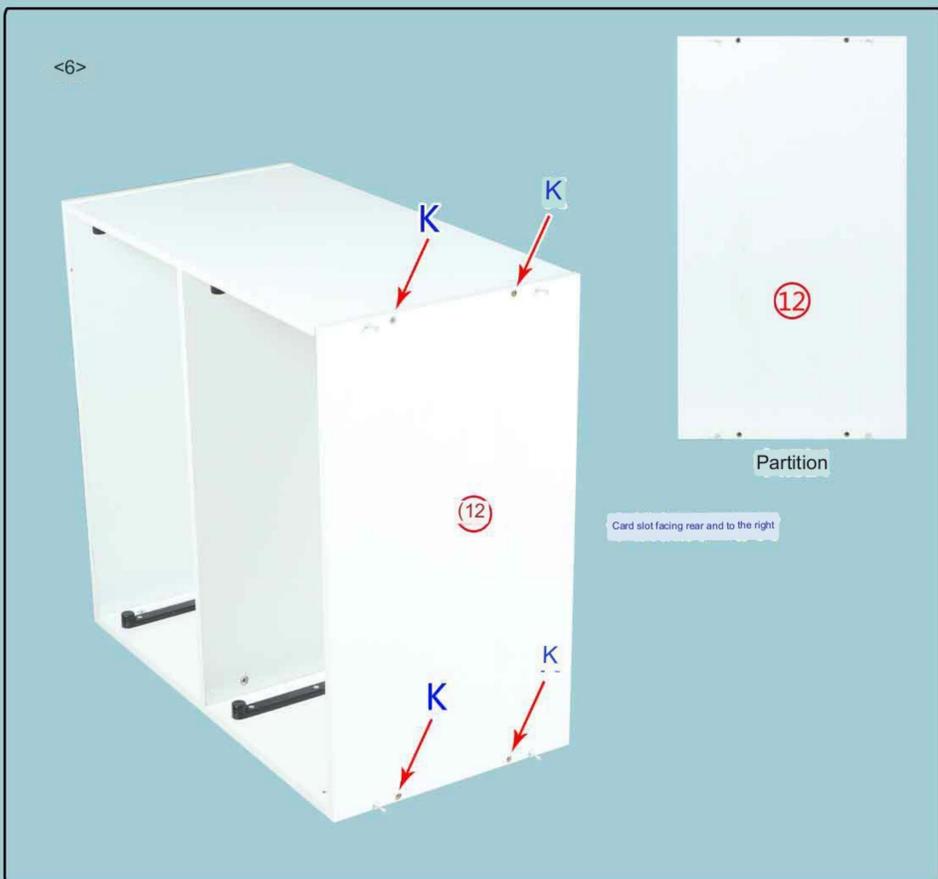

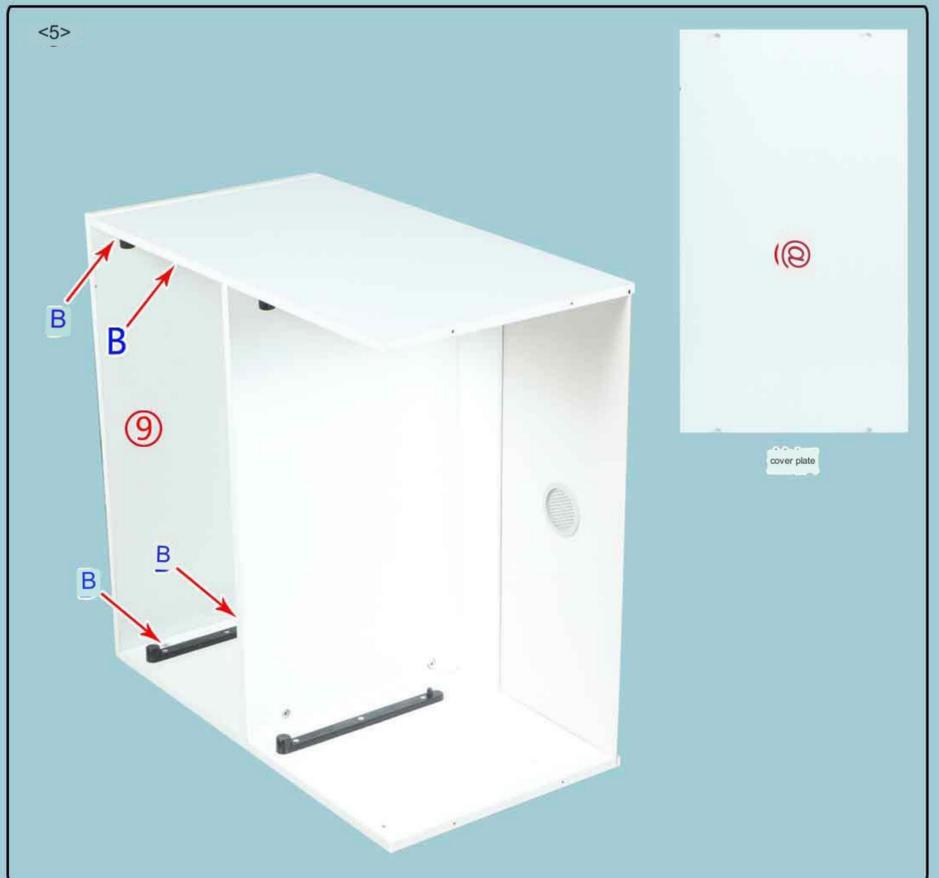

<3>

Step 2: Top Half Installation

1. Put the door panel upside down and stuff it into the cabinet

2. Align the hook on the door panel with the column on the support and hang it

3. After hanging up, lift the door panel and push it inside

4. Insert the metal pin on the side panel to block the door panel
