

BS003

Installation Instruction

Parts List

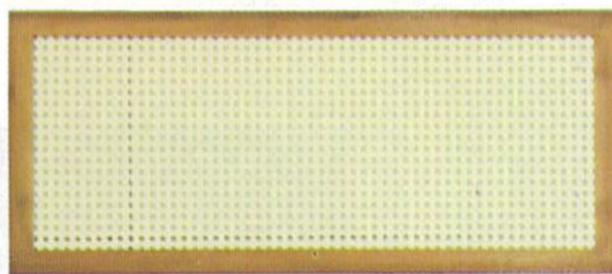

Take 5 floors as an example

Side bracket left x1

Side bracket right x1

door panel x5

Backplane x5

top shelf x1 (with groove on one side)

Ordinary laminate x5 (both sides with grooves)

door stopper x4

Door pull ring x4

metal clip

door gasket

small screw

medium screw

large screw

installation tool

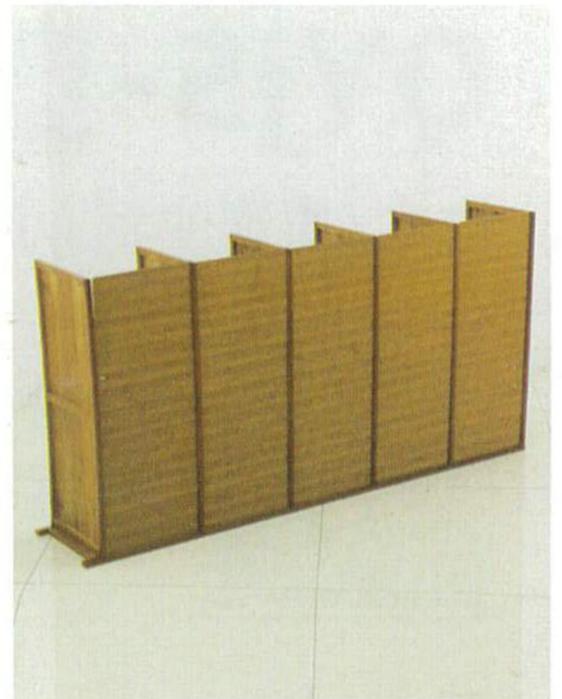

start assembling

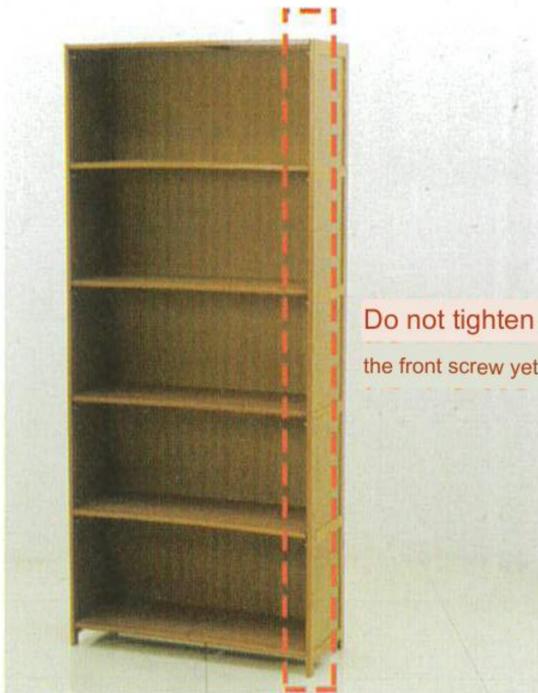

1. Take out the left side bracket and install the ordinary laminate with large screws

2. Take out the top laminate and install it with large screws

3. Take out the back panel and insert it along the groove

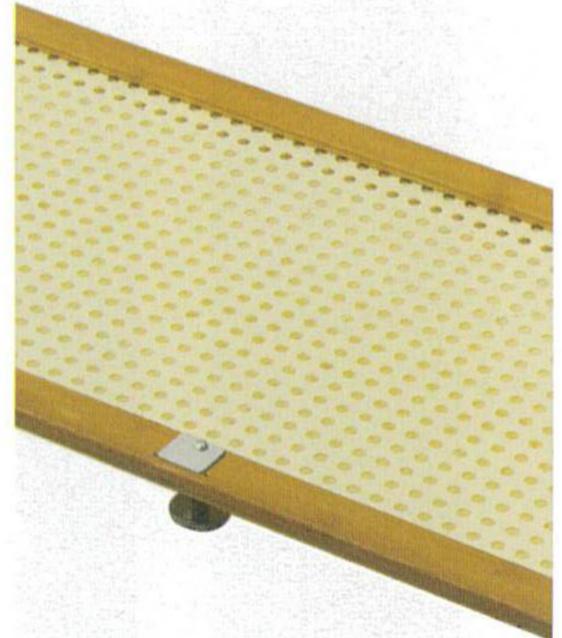

Do not tighten the front screw yet

4. Take out the side bracket and install it with large screws

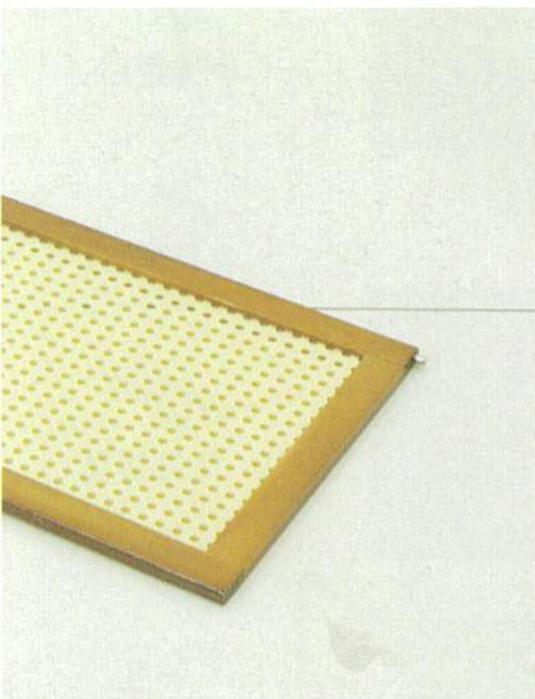

The metal strip remembers to snap into the hole, not the groove

5. Take out the metal strip and insert it into the groove of the side bracket

6. Take out the door panel door gasket, door pull ring and install it with No. 2 screws

7. Take out the door panel and insert metal clips on both sides of the door bolt

Since the screws in the fourth step are not tightened, the side bracket can be gently opened

8 Gently open the right side bracket, then snap the door panel into the groove of the side bracket, and then screw on the screw on the right side bracket.

9. Take out the door stopper and install it with small screws. The side of the door stopper with the metal strip faces forward
